DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 07077281 ("JP 281").

i. JP 281 discloses a sliding contact seal structure comprising a combination of the seal member (S) and the shaft member (11).

ii. Examiner's Note: The fact that the sum of the surface energy of the seal member is 95 dyne/cm or less on a sliding surface is given very little if any patentable weight. Applicant has not discloses any structure, different from the prior art, that would achieve this result.

B. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Enoch E Peavey whose telephone number is 305 1977. The examiner can normally be reached on Mon-Fri 8:00 am to 4:30 am.
